

# Real insight from real automotive experts

**In the automotive market, meeting future goals starts with decisions made today. Weighing out factors that can heavily impact performance and efficiencies is dependent on insight from a trusted partner. We're proud to strengthen our technical service support with the addition of a dedicated on-staff expert to serve our automotive customers.**

As industry experts with extensive automotive engineering backgrounds, we're passionate about providing robust solutions that are grounded in expertise. We rise above the industry standard and go well beyond the sale. Through extensive insight, our depth and breadth of resources and outrageous level of service, we're driven to find the best solutions for you.

- ▶ Customized industry insight from Automotive Business Development Manager, Jason Merkle
- ▶ Multi-sourcing capabilities with OEM approved products and access to specialty and engineered products. Double- and triple-sourced material options that meet specifications
- ▶ Extraordinary support and renowned service including same-day shipping and 2-hour call backs

# From resin to reality

As industry standards evolve, we challenge ourselves to raise the bar even higher.

By having first-hand knowledge of material characteristics, manufacturability and performance of existing products—and even resin in the development stages—we're committed to doing more than helping you meet mandates and standards, we aim to exceed your goals.

- ▶ Material data and performance assessment—including variables such as heat dissipation, strength, flexibility, noise/vibration and structural integrity—to help you determine the best solution up front
- ▶ Access to a line of more than 18,000 engineering, specialty and commodity thermoplastics
- ▶ Customized solutions geared around achieving your goals
  - Lightweighting
  - Emissions
  - Sustainable materials
  - Safety initiatives
  - Cost savings
- ▶ Global sourcing and distribution through facilities in U.S., Canada and Mexico
- ▶ ISO 9002-, QS 9000-, TS 16949- and A2LA-certified supplier testing facilities
- ▶ ISO 9001:2015 certified

## Driving your success

We have a thorough understanding of your needs – even long after your product evolves in the production cycle. You can depend on us to continuously guide you through material selection, provide problem solving expertise and supply chain management efficiency.
